PROFESSIONAL SUMMARY

Software Engineering student (BEng, Canterbury Christ Church University, 2024–2028) with demonstrated experience building full-stack, data-driven, and AI-enabled applications. Proficient in cross-platform development using React/React Native with TypeScript, Python data tools with forecasting models, database systems with Supabase and PostgreSQL, and game development with Godot Engine. Skilled at translating user requirements into reliable software through iterative development, testing, and documentation.

KEY ACHIEVEMENTS

- Recipient of the *Skinnners Award* for achieving the highest A-Level grades in Year 13 (2024).
- Developed multiple full-stack and AI-integrated projects using React, TypeScript, Python and Supabase.
- Achieved strong first-year university results (Programming Design & Development: 88%; Mathematics for Computer Science: 95%).
- Led Agile sprints and collaboration on a cross-platform app (React/React Native) using GitHub and Figma prototypes.

EDUCATION

Canterbury Christ Church University 2024 – 2028

BEng (Hons) Software Engineering

Year 1: Programming Design & Development (88%), Mathematics for Computer Science (95%), Ethics & Employability (78%), Fundamentals of Computer Systems (74%), Computational Thinking (57%)

Year 2: Computer Networking, Database Design, Project & Professional Skills, Computer Security, Software Engineering, Web Programming

Marsh Academy Sixth Form 2022 – 2024

A Levels

A Levels: Computer Science, Mathematics, LIBF Financial Studies

Award: *Skinnners Award* – Achieved the highest A-Level grades in Year 13 (2024)

TECHNICAL PROJECTS

Progresso – AI-Integrated Self-Improvement App (Lead Developer) 2025

React, React Native, TypeScript, Supabase, Deepseek API, Figma, GitHub Codespaces

- Built cross-platform web and mobile clients with gamified tasks, streaks, rewards, and leaderboards for user engagement.
- Integrated AI chatbot assistant using Deepseek API; implemented Supabase authentication and PostgreSQL backend.
- Prototyped UI/UX in Figma and led development using Agile sprints with version control collaboration.

UK Homebuyer Forecast Application (Developer & Data Engineer) 2025

Python, Streamlit, pandas, numpy, statsmodels, Plotly, ReportLab

- Developed forecasting tool using Monte Carlo (CAGR + volatility) and ARIMA models with P5/P50/P95 confidence intervals.
- Implemented savings simulation calculator with inflation adjustment (CPIH/CPI) and affordability assessment.
- Integrated postcode lookup, multi-area comparison, PDF report generation, and caching for performance optimization.

2D Game with Persistent Data (A-Level Project) 2023

Godot Engine, GDScript, SQLite

- Designed game mechanics with scoring system and multiple levels; integrated SQLite for persistent player progression.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C#, Java, GDScript, Lua, SQL (PostgreSQL, SQLite)

Frontend & Frameworks: React, React Native, Next.js, Streamlit, Vite, Godot Engine

Data & Analytics: pandas, numpy, statsmodels, Plotly, Monte Carlo simulations, ARIMA time-series modeling

Databases & APIs: Supabase, PostgreSQL, SQLite, REST APIs (postcodes.io, UKHPI, ONS, Deepseek)

Tools & Practices: Git, GitHub, Figma, VS Code, Agile methodologies, SDLC, testing, requirement analysis

WORK EXPERIENCE

Lighthouse Helper – Dungeness Old Lighthouse

Oct 2022 – Mar 2023

Provided customer service, managed till operations, and ensured health and safety compliance.
